## Customer Reviews

Lee's book is a must for all estheticians (skin care specialists) and medical personnel looking for a simple-to-understand text directed to teach and provide review about basic skin chemistry, ingredient chemistry, skin disorders, their causes, challenges, and how to treat. His chapters on "The Immune System" and "Essential Knowledge of Chemistry," give a a great dialogue on understanding our immune system and basic chemistry. Mr. Lee is a great teacher. He puts difficult theories into "people language." Skin care correction for highly damaged skin is very well explained. Having been in professional skin care for 17 years, I find this book a marvelous reference. Its provides some of the latest findings and theories for accurate analysis. For the lay person, new student, or beauty editor, it offers great insight into the complexity of our skin, the body's largest

organ, and how it plays a vital role to protect us. It also explains about skin diseases and how they are recognized and treated. The best thing is that this is an accurate book based on science and written by a well qualified and experienced person. After all, skin care is a science and plays a large role in preventative health care.

As a licensed esthetician, I find this book my best resource. It covers most of the questions I have had as a skin care professional and many of my client's questions as well. I consider this book essential to anyone in my profession. It is readable and understandable for anyone, those in the business or those just wanting to understand their skin and what products can help them.

Up to date information on the latest in anti-aging treatments, microdermabrasion, skin peels and exfoliators, explanation of product ingredients, and much more. As an experienced skin care specialist this book is a must for your reference library.

Great text! Is exactly what I was looking for and has all the info I was looking for! Great for skin students that have to research, has everything

I got this book quite a while ago now. I got it well before I became an Aesthetician and a Make up Artist. I just wanted to know as much as possible on every new thing when it came up. How to do different procedures for things and always wanting knowledge.
