Research Methods In Education: An Introduction (9th Edition)
Synopsis
A classic in its field, Research Methods in Education explains the research process with emphasis on the formulation of a research question, referencing current literature in the field, using appropriate research designs, and writing and evaluating research reports. Both quantitative and qualitative research designs are described. Measurement, sampling, and statistics are presented as essential research tools. Retaining the clear, concise writing style and organization that has made this text so popular, Research Methods in Education helps students evaluate research literature as well as master research methodology. It emphasizes the rationale for commonly used research procedures and their applications. The authors outline the nature of educational research and clearly define the steps in the research process. The text is broad in scope “covering both quantitative, qualitative and mixed methods research methodologies as well as describing how to write research proposals and reports of completed research. Research Methods in Education gives students a solid understanding of all the elements of research.

Customer Reviews
I thought that the book was very comprehensive and a wonderful reference for my research methods course. I did not use the multimedia provided (cd-rom or internet site), as the information in the book was good enough. I would recommend this text for any research methods course.

If you are not already a statistician and do not expect to be a heavy-duty researcher, this is the
volume to have on your bookshelf. It gives you the essentials for setting up your research and gives your enough information and basic understanding of stats to be able to carry on an intelligent conversation with your statistician about your research needs.

The book was required for my course and cost a lot less on than at the University book store. A very good text for the topic.

Excellent all the way around. I would buy from them again. Very satisfied overall.
