# CalcuLadder 1: Basic Addition And Subtraction (Classic Edition) (A Learning Vitamins Unit)

## Synopsis

CalcuLadder™ 1 includes drill Levels 1 - 16, which cover basic addition and subtraction. Your student is thoroughly drilled on all addition and subtraction facts with answers less than or equal to 20. Drills 1-14 have a suggested time goal of 2 minutes. The drill Levels are carefully sequenced to add new facts while reviewing previous ones. The final two Levels provide a comprehensive review of all facts, and have a suggested time goal of 3 minutes. The purpose is to get basic addition and subtraction facts down cold, so that the student knows the answers instantly. Use CalcuLadder 1 in Grades 1, 2, 3, or higher for a really solid foundation or to fill gaps in basic math mastery. Learning Vitamins™ are some of the most effective, easy-to-use learning aids you're likely to find for math, penmanship, and alphabetizing skills. The most important thing is to use them every day. Here's the basic idea: Have your student repeat a given drill once each day until he is able to complete it correctly within that drill's suggested time goal. Grading the drills is a snap with the unique QuicKeys™ whose answers line up underneath the student's answers! When your student passes a given drill, fill in his Achievement Record and promote your student to the next drill! Learning Vitamins: • help kids get facts down cold and skills down pat • make weak areas stand out, helping you teach where needed most • change slow, awkward struggle into fast, confident skill • build character thru a relevant Bible text on each page • a supplemental program of quick, potent, one-page, timed drills • fully reproducible - buy once, then use with all your students • for daily use, to make skills really 'click' in just minutes a day • great for tutorial, full classroom, small group, or self-study • perfect for remedial, review, summer brush-up, normal, or accelerated/gifted use

## Book Information

Spiral-bound: 192 pages

Publisher: The Providence Project (2004)

Language: English

ISBN-10: 1590570030

ISBN-13: 978-1590570036

Product Dimensions: 10.2 x 8.2 x 1.4 inches

Shipping Weight: 1.2 pounds

Average Customer Review: 5.0 out of 5 stars • See all reviews • (2 customer reviews)

Best Sellers Rank: #1,337,700 in Books (See Top 100 in Books) #488 in Books > Health, Fitness & Dieting > Nutrition > Vitamins & Supplements #2310 in Books > Computers & Technology >

## Customer Reviews

There is no prep required. All you need to do is give your child a pencil! This is great for a busy parent that doesn't have time for flashcard drills or for the babysitter to give to the child. There is no "teaching" necessary. In each book there are 16 different "levels" and each level has the same page repeating for 12 pages. Eventually they complete the page with more speed. The instructions are a page a day but when starting a new page we do 2 lines the first day, then he works up to the 1/2 page mark, then the rest of the page the 3rd day. Then we repeat the page again over 2 days doing 1/2 page each day. I prefer the book over the loose print outs from the CD but the CD may be more economical if you have more than 1 child. Doing one page a day x 20 days per month it would take about 10 months to complete a book. If you have an older child that needs some remedial help you could always assign 2 pages a day - maybe a page during breakfast and then again after dinner. If your child needs math fact reinforcement this is a great product for a child of any age.

Edwin Myers never disappoints. Have used this for years. Still works beautifully.
