Great ideas. So many things I never knew. I am defiantly going to give a few of these things a try. I work the night shift so the tricky part is getting the energy I need at the end of a shift without keeping me awake when it is time to sleep. I think the exercises will help with that.

I am in the health care field and a major complaint with many of my patients is that they are lacking in energy. Most are addicted to increasing amounts of caffeine, found in coffee, chocolate, energy drinks that are loaded with caffeine, etc. Basically stimulants. I am often looking for any information that will help them to curb or eliminate this vicious cycle and addiction. This book is a breath of fresh air. Energy boosters from all natural sources. I would recommend this book to all of my patients! Thanks, Deborah

It's hard to kick the habit of instant gratification for every ailment from aches and pains to lack of energy. Increase Your Energy and Kick the Caffeine provides natural alternatives to transition from the addiction of caffeine, whether you rely on GMO corn syrup energy drinks or excessive coffee intake. The book gives a variety of different approaches to create new habits for boosting energy for long lasting energy opposed to the energy spike/crash cycle. Since everyone's bodies are different, each individual responds differently to different approaches. Some need environmental or physical changes while others need necessary supplements or dietary refinements. All changes in habit require work and dedication, but our health is worth it and usually the work isn't difficult. It just requires us to make subtle shifts in how we go about our day and this book gives simple ways of making the transition.
