In my opinion, the authors failed miserably with providing any additional interpretations or clinical applications beyond what is provided in the test manual and scoring disc.

This book, like the others of the Essentials, is a wonderful tool to use in learning these assessments so vital to school psychology practice. As a doctoral graduate student I turn to this book to gain a more thorough understanding of these assessments and turn to often as reference. It is also a good tool to use for report writing. It is a great supplement to the manuals that come with the WIAT-III and KTEA-II and is divided into sensible chapters with handy quick reference charts in the front of the book.

I really enjoy these Essentials books for assessment measures. They offer a deeper explanation of the measures, their strengths and weaknesses, and their overall efficacy for educational professionals, especially School Psychologists.

Not much more than what's included in the technical and interpretive manuals for each test, although I like seeing the sample reports.

good book but includes comparisons with WISC IV, not WISC V

Helpful on the WIAT-III although does not make scoring of writing portions any plainer. KTEA is not new so not as relevant for my purposes.
